

- Complete and balanced nutrition, in accordance with fish nutritional requirements
- Strengthen the immune system and reduction of skeletal malformation
- Contain high levels of vitamins, minerals immunostimulants and phospholipids
- Higher survival rate with ensuring the optimal growth

- Complete and balanced nutrition, in accordance with fish nutritional requirements
- Ensuring the optimal growth with lower feed conversion ratio (FCR)
- Developed to increase of growth rate and reduce of cultivation period
- Boosted with immune-stimulating ingredients to promote the immune system's reactions

- Complete and balanced nutrition, in accordance with fish nutritional requirements
- High feed stability and maintaining optimal water quality
- Reduction of feed conversion ratio (FCR) and achievement of higher weights in shorter time
- Boosted with immune-stimulating ingredients to promote the immune system's reactions
